Investing in Future Leaders in Pharmaceutical Science Research and Education
**Pre-Doctoral Fellowship in Pharmaceutical Sciences**
The primary goal of the AFPE Pre-Doctoral Fellowship program is to support students who have leadership potential in the pharmaceutical industry, academia, and government. The pre-doctoral fellowships offered by AFPE frequently inspire the direction of our students' careers. Progress in research will require an infusion of new well-trained researchers entering the field.

**Dr. Paul B. Myrdal Memorial Pre-Doctoral Fellowship in Pharmaceutics**
This fellowship, in memory of Dr. Paul B. Myrdal, is awarded to pre-doctoral and Pharm.D. students who are conducting research in the field of pharmaceutics.

**Herb and Nina Demuth Memorial Award**
The Herb and Nina Demuth Memorial Award recognizes pre-doctoral students whose research focuses on parenteral drugs.

**Pre-Doctoral Fellowship in Pharmaceutical Sciences for Underrepresented Minorities**
Awarded to minority student(s) in a graduate PhD program in pharmaceutical science who have potential to contribute to the field and ultimately impact patient and public health.

**ASHP-AFPE Pre-Doctoral Fellowship**
This fellowship is awarded to students whose research projects focus on improving health outcomes in hospitals, health systems, and ambulatory care clinics.

**Pre-Doctoral Award in Health Outcome Disparities**
The Pre-Doctoral Award in Health Outcomes Disparities is a designated fellowship for a pre-doctoral student whose research focuses on either a disease area that disproportionately impacts underserved populations or whose research focuses on reducing healthcare disparities and improving health outcomes for underserved populations in the United States. Examples of this research could include sickle-cell anemia, asthma, HIV/AIDS, maternal and infant mortality, access to medication, etc.

**AFPE Regional Award**
This award recognizes a pre-doctoral fellow living in Michigan, North Dakota, South Dakota, Minnesota, or Wisconsin.

**Phi Lambda Sigma-AFPE Fellowship**
Awarded to Phi Lambda Sigma members to encourage the pursuit of a PhD in the pharmaceutical sciences in a college of pharmacy graduate program.

**Kappa Epsilon – AFPE Graduate School Fellowship**
Awarded to members of the Kappa Epsilon Fraternity to encourage outstanding members to pursue an advanced degree in a college of pharmacy graduate program in the pharmaceutical sciences.

**Rho Chi - AFPE School Fellowship**
Awarded to members of the Rho Chi Honor Society who have demonstrated high potential for success in a graduate program (PharmD and/or PhD) based on academic achievement, research achievement, and personal achievement.

**Gateway to Research Award**
The primary goal of the Gateway Research Scholarship program is to improve health outcomes by equipping students with a better understanding of research and enabling them to apply that knowledge to improve their clinical skills.

**Underrepresented Minority Gateway to Research Award**
This award recognizes a Gateway Awardee who belongs to a racial/ethnic group that has historically been underrepresented in the pharmaceutical sciences.

**William M. Heller Mentor of the Year**
William M. Heller (Bill) is a dedicated AFPE Fellow, mentor, global visionary, Remington awardee, Harvey A.K. Whitney lecturer and, former AFPE board member, and the former Executive Director of USP. Bill has dedicated his career to drug quality and safety. His outstanding skills as a mentor of many AFPE fellows and other students have impacted those who are fortunate enough to have worked with him throughout his career.

The William M. Heller Mentor of the Year is a highly visible award. Mentors are an integral part of AFPE’s mission. The Mentor of the Year is given to the AFPE mentor who exemplifies the characteristics of valuing ongoing learning, a willingness to share expertise, exhibiting enthusiasm in their field, providing guidance with respect, and is nominated by AFPE fellows who have been mentored by the award recipient.

**AACP Social and Administrative Sciences Section Summer Research Exchange Mentorship Program**
The SAS Research Exchange Mentorship Program is intended to foster interest in research and SAS-related graduate education among student pharmacists. The program is open to P1-P3 students, who complete a research experience with a SAS faculty member outside their home institution, building their professional network and skills for residency, fellowship, and further graduate studies.

**Scholarship of Teaching and Learning Grant**
The Scholarship of Teaching and Learning Grants (SOTL) sponsored by the American Association of Colleges of Pharmacy (AACP) and AFPE provide research funding for active members of AACP who are engaging in educational research.
AFPE is pleased to announce the 2022 William M. Heller Mentor of the Year Award recipient is Dr. Peter W. Swaan. The William M. Heller Mentor of the Year Award recognizes faculty who are nominated by their students and colleagues, for their guidance, dedication, leadership, instruction, and encouragement.

Peter W. Swaan, MPharm, PhD, FAAPS is a Distinguished University Professor, Chair of the Department of Pharmaceutical Sciences, and Associate Dean for Research and Advanced Graduate Studies at the University of Maryland School of Pharmacy. Dr. Swaan has taught professional (PharmD) and graduate students for over twenty-five years and has been on advisory committees of over 50 PhD students. He has mentored numerous postdoctoral scholars and 25 PhDs have graduated under his mentorship who are currently working in academia, pharmaceutical industry, government, and regulatory agencies. Dr. Swaan’s research has focused on all aspects of transport proteins in drug targeting and delivery, pharmacokinetics and pharmacodynamics, and innovative methods for drug delivery, with a special emphasis on nanotechnology platforms aimed at increasing oral drug bioavailability. His major research contributions involve the application of transporters as targets for prodrugs; additionally, Dr. Swaan pioneered the application of computational techniques to determining structural requirements of membrane transporters, thereby paving the way for the rational discovery of novel substrates and inhibitors. His work has been funded by the National Institutes of Health, the Food and Drug Administration, and various other foundations, non-profits as well as the pharmaceutical industry. He is also an active mentor on several NIH T32 training grants, including the IMSD diversity program. He also coordinates the Clinical Development Fellowship program with AstraZeneca, a two-year post-PharmD program focused on clinical cancer pharmacology in an industrial setting. Dr. Swaan has served on numerous peer review panels for the NIH, including as a permanent member of the XNDA study section. He holds several US patents and served as Editor-in-Chief for the Nature-Springer journal Pharmaceutical Research (IF 4.2) from 2010 to 2021.

“Dr. Swaan was my graduate advisor and mentor at the University of Maryland, Baltimore. As an educator, he has a great understanding of his student’s capabilities and pushes them first to develop a strong scientific foundation through coursework and then provides the flexibility to explore their scientific interests. As my mentor, he provided me a rigorous training experience tailored to my translational research interests but with enough structure to ensure I was set up for the best chance of professional success.” - Lindsey

“Dr. Peter Swaan was a mentor to me during my graduate studies as a dissertation committee member. He helped guide my research and ensured I progressed through the graduate school’s requirements. He helped boost my career and research by writing recommendations and providing guidance for graduate student fellowships and grant applications. In this way, he not only offers academic mentorship but aids his students in procuring vital funding for research. Dr. Swaan is an exceptional person and mentor and indispensable to the pharmaceutical sciences department at the University of Maryland Baltimore.” - Jack

“Dr. Peter Swaan has been a friend and mentor to me (and many others) for 25 years. Our relationship started while I was a graduate student, and he was a faculty member at OSU. Peter’s personal and professional attitude and passion for pharmaceutical research and desire to have an impact on human health had and continue to have a critical impact on my career trajectory and goals. Over the years, Peter has continued to be a resource to me, and he has provided guidance and council through my AAPS leadership as well.” - Andrew

“As a graduate student, I volunteered tutoring pharmacy students from immigrant parents and realized that helping students reach their full potential is the true gift of being a teacher. This molded my view of teaching and mentorship which I have carried with me throughout my academic career. I also believe that mentorship does not stop at graduation but is a lifelong commitment that provides its highest rewards when you see your mentees excel and progress during their different career stages.” Peter Swaan

About PharmON
Established in 2022, the Pharmacy Opportunities Network (PharmON) is a national career center where a diverse array of corporations, associations and other entities can post experiential learning opportunities, such as internships or jobs, to thousands of current Pharm.D. students, residents, fellows, graduate students and practicing pharmacists.

The length of each experience is up to the host entity and, while many internships are traditionally available for 10 to 12 weeks in the May to August timeframe, the co-sponsoring organizations encourage host companies to think about flexible experiential learning opportunities. Opportunities can take place on site or remotely and can occur all year.

Questions?
Visit the AACP website for more information, including comprehensive FAQs, at www.aacp.org/resource/pharmon. Contact Tom Maggio, Public Affairs and Engagement Manager, with any questions about PharmON, at tmaggio@aacp.org.

Give Your Opportunities Added Visibility
Reach more than 60,000 Pharm.D. and graduate students and 142 schools by posting a learning opportunity on PharmON. Your job will stay top-of-mind for learners through multiple distribution networks, including:

• Regular email marketing through AACP’s numerous student and member listservs
• Regular announcements on AACP Connect, the organization’s online member community
• Frequent exposure on AACP’s social media channels, including LinkedIn and Facebook

Extend the Reach of Your Opportunities
Connect with thousands of prospective candidates by posting your experiential learning opportunity on PharmON. Packages and pricing include:

30-Day Posting: $199
60-Day Posting: $398
Job Flash™ Package: $299
• Posting for 30 days and job emailed to all opportunity seekers

Premium Internship Job Flash™ Package: $399
• Posting for 30 days and job emailed to all opportunity seekers
• Pinned as a top job in an individual’s search results
• Highlighted on the PharmON homepage
